

Want To Carve Better?

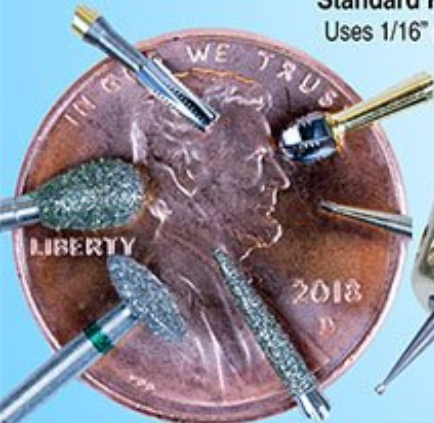

Whether a beginner or Master carver, you can take your art to the next level by using the Vortex F5 High Speed Carver.

VORTEX F5 PLUS Is the world's fastest high speed precision carver! 500,000* RPM at 40 PSI

- High Speed Turbine Carver for the 21st Century
- Free Running Maximum Speed 500,000* RPM
- Ceramic Shielded Bearings Permanently Lubed
- Easy To Replace Non-Proprietary Turbine
- Takes Standard High Speed FG 1/16" Burs
- Lightweight for Superior Control 1.8 ounces
- Powerful 7 Port Manifold, 24 Vane Impeller
- No Chatter or Vibration, Operate at Any Angle!
- Autochuck roundness precision 0.00004"
- High Output Power (Torque)
- All Metal Design, NO Plastic!
- Made in USA
- Lifetime Warranty, 1 Year Turbine

*Higher pressure will produce higher RPM, but not recommended due to safety concerns.

Standard FG Burs
Uses 1/16" (1.6mm)

No Air Hose Interference
or Plunger! Carve at any angle

Smooth Elegant Design
True tactile feedback

Shown Larger Than Actual Size
Only 4 1/2 inches, 1.8 ounces

Powered by Air
29 to 40 psi

Strong Grip Hose Barbs
1/8" ID, 4 barbs

Twist-Lock Bur Release
Twist 1/4 turn to operate

Stainless Steel 303 Alloy
12 fluted cap grip

Internal Cam Eliminates Plunger
Mechanical advantage bur removal

6061-T6 Alloy Housing
Same as used in aerospace

Red Anodized Housing to MIL-A-8625
Corrosion, Abrasive, Wear resistance

Ceramic Lube-Free Bearings
Shielded to keep debris out

C360 Brass Nosecone
Integrated manifold & turbine

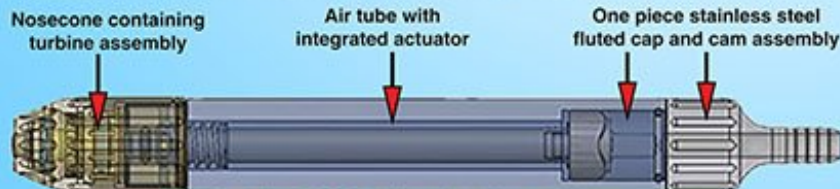

12 Fluted Nosecone Grip
Enhanced control & feel

10 Seated Forward Exhaust Jets
Blows carving dust away

Laser Engraved
Detent bur marks - Lock or Release

Internal X-Ray view showing the detailed geometry of the Vortex F5.

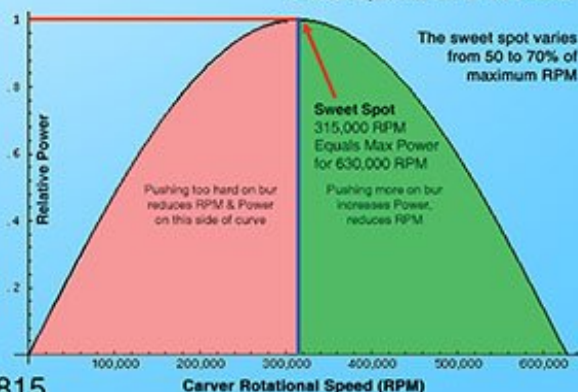

Shown Actual Size 4 1/2 Inches.
Yes, it really is this small, the size of pen!

Amazing Fa-brick is a transparent textile and decoration hardener. Dip nearly any porous natural materials, such as textiles, into Amazing Fa-brick and it will become stiff and rigid when dry. Drape or wrap your fabric around a wire figure, paper mache or other armature to make sculptures from fabric. Dries transparent or add colored pigment powder to give a new look to your sculpture.

AMAZING PIGMENT

Add beautiful color to Amazing Fa-Brick or Amazing Sculpt with our rainbow of dry pigments. Easy to use, just add a small amount of pigment to Amazing Fa-Brick or Amazing Sculpt (Part A), mix until even. Want a different shade? Mix more or or less pigment. How about a different color? Amazing Pigments can be mixed together to achieve a desired shade or color. The "Small" containers are 1/4 fl.oz, about 8ml and can pigment up to 1 gallon of Amazing Fa-Brick or 8 pounds of Amazing Sculpt.

Our carbide burs and cutters are designed for multi-use and last much longer than "disposable" burs. All burs are designed for Turbine Carving Tools with a 1.6mm (1/16") diameter shank. These include the Vortex, Power Carver, Powercrafter, Turbo Carver, etc. • CNC precision manufacturing produces a top quality bur that exceeds industry standards for quality and precision • Highest quality raw materials: One-piece, fine-grain tungsten carbide design ground to the shape resulting in zero vibration, superior durability, optimal cutting efficiency • Ability to withstand repeated abuse • The most concentric bur ever produced - consistent in size resulting in less chatter, superior control, efficient cutting and finishing

CARBIDE TAPERED FISSURE BURS

Tapered Fissure Burs are used for high definition engraving in metal, outlining in wood or egg. With the FG-699L being our most popular for Egg and Wood Piercing. Tapered Fissures are very good for outlining. *Each bur is sold individually.

Our diamond multi use burs are manufactured in Israel providing enhanced quality. Each bur is hand checked to ensure 100% quality control. Advanced electroplating guarantees a full diamond coverage making each of our burs lifespan longer. Our burs are created for fast cutting. • The diamond bur surface is very homogenized using special Hexagonal Boron Nitride HBN plating. • A mix of high quality natural diamond grits reduces carving time. • Stainless steel, Swiss made blanks are 1 piece, all hardened and ground for maximum precision. • All burs are designed for Turbine Carving Tools with a 1.6mm (1/16") diameter shank. These include the Vortex, Power Carver, Powercrafter, Turbocarver, etc.

DIAMOND KNIFE EDGE BURS

Diamond Knife Edge burs are used on glass, all metals, stone. Used to carve straight grooves and for sectioning.

AIR FILTER MOISTURE TRAP

This combination air filter and moisture trap removes dirt & debris larger than 40 microns and helps catch condensed water. A must for improving the life of your turbine bearings. For best use, have at least 10 feet of hose between your air compressor and this filter. This will ensure the air has cooled and the water vapor has condensed where it can be collected by the trap. Your air compressor connects to the "IN" port and the Vortex F5 to the "OUT" port. Collected water drains automatically when air pressure is turned off. Remember to order 2 brass hose barbs. The hose barbs are 1/4-18 NPT and push onto 1/8 inch inside diameter hose. *Actual item photo may vary.

VORTEX F5 SERVICE

F5 Turbine Bearing Service - Two Options:

1. **Bearing Only Service:** Your Vortex F5 nosecone and components (manifold, impeller, spindle, pressure plate) will be Ultrasonically cleaned, New shielded front and rear ABEC-9 ceramic lube-free radial contact bearings installed, new pre-load washer and pressure plate if needed, and new o-rings.
2. **Bearing & Power Upgrade:** Same service as Option 1 with added "Power Upgrade." Your nosecone manifold will be ported to allow more air flow through the turbine. This increased the power of your tool. This effectively turns a standard Vortex F5 into a Vortex F5+ Plus.

When you purchase this service, print a copy of your receipt and include it when you send your Vortex F5 in for repair. When we receive your Vortex F5, it will be serviced and returned within a 1 week. Please note, your Vortex F5 must be received withing 30 days of placing a service order.

Send your tool to this address below. Pack your tool well. Insurance and Tracking are recommended.

STENCIL AND TRANSFER FILM

The stencil film is the secret behind making beautiful artwork. Simply copy the artwork from the internet, magazines, books onto the stencil film with any scanner/printer.

Stencil film has unique self adhesive film can be imaged on laser or ink jet printers. The image can be cut out and applied to most surfaces by peeling off the backing. Use your Vortex F5 to trace the image resulting in a transfer to your artwork.

Stencil film consists of a thin top film made from coated polyester film. The film is extremely tough considering its thinness. The top coating is specially formulated to allow toner and ink from your printer to adhere. You can also draw on the surface with pen or pencil.

Sheet size is 8 $\frac{1}{2}$ inches, only 1 mil thick, yet very tough. The film has a clear matte finish with a peel-off adhesive backing. Note: Ink jet users, set your printer to "Draft", "Fast Print" or "Glossy Photo Paper."

AMAZING EMU EGG

This is an Emu egg reproduction molded off a real emu egg made specifically for egg carvers. We started by finding a very nice Emu egg. Then we created a 2-piece mold using industrial silicone capable of reproducing the finest details. We were amazed that the molding result captured every minute detail. (See photo enlargement showing texture.) Now the fun part - we placed the mold on a rotational casting machine and charged the mold with 2 ounces of pristine white polyurethane resin. The end result was an amazing hollow resin Emu egg. This is perfect for the egg carvers because it has even better qualities than a real Emu egg. This listing is for 1 hollowcast resin Emu egg.

The egg stand/holder, Vortex F5 carver, Ultimate Bur Set for Egg, Burs and Model Horses are not included.

EQUUS SERIES - YEAR OF THE HORSE 2014 - .999 FINE SILVER ROUND

This is the first bas relief in the "Equus Series" by the International equine sculptor, Debbi LerMond, for the .999 Fine Silver Round edition to commemorate the Sheng Xiao "Chinese zodiac" for 2014, the Year of the Horse. Utilizing her 50+ years of involvement with this noble breed, Debbi wanted her first edition to showcase the beautiful head which sets the Arabian apart from any other breed of horse. She was inspired by a captivating photo of the Arabian stallion, Najjar and knew he would be befitting for her first Silver Round edition. This Limited Edition of 200 of one Troy ounce of .999 Fine Silver Rounds is sequentially numbered on the edge to insure the authenticity of the sculptor's work.

POWERCRAFTER CARVER IS PERFECT FOR BEGINNERS

Powercrafter Carver

The Powercrafter carver is a high speed air turbine carver tool that cuts, engraves, and carves any surface with ease. You no longer have any surface limitation. All wood, bone, stone, glass, ceramic, metal, and even delicate eggshell can be sculpted like writing with a pen.

The PC205E Kit is designed to give you everything needed to connect your air compressor to your new carving tool. Your new Powercrafter will cut, carve, or engrave on any surface. The high speed gives you greater control with no heat or vibration. The Powercrafter Air Tool comes with a factory lifetime guarantee on the stainless steel body of the tool and a 1 year warranty on the turbine assembly. The tool uses 1.5 CFM at 40 PSI air requirement to run correctly (a 1 HP air compressor minimum). The instructions guide you through setup, changing cutters, and how to use the adhesive stencil film.

Powercrafter model number PC205E. We recommend you review our 7 carver side-by-side comparison [here](#).

SMOOTHING SOLUTION

An Environmentally Green product designed for smoothing self-hardening synthetic clay, Amazing Smoothing Solution is the perfect “must-have” companion for feathering, texturing, tooling, cleaning sculpting tools and brushes and/or removing stickiness. Use on non-cured synthetic clay to get a glass smooth finish. Tip: When working with self-hardening synthetic clay, apply Amazing Smoothing Solution onto your gloves so the clay will not stick to them. Unlike using water or isopropyl alcohol, Amazing Smoothing Solution will not drag when smoothing putty. Non-Flammable, Biodegradable, Environmentally Safe and Friendly. Use water based Amazing Smoothing Solution as a safer alternative to acetone, denatured alcohol, MEK or other commonly used toxic solvents.

Features and Benefits

- Environmentally Green product
- Clear liquid, won't discolor your work!
- Use for smoothing 2-part epoxy putties
- Cleans brushes and sculpting tools
- Removes stickiness
- Water clean-up

Our Sculpting Clays are 2-part clays and self-hardening. Both Amazing Sculpt and FXclay were developed by a professional equine sculptor to capture ultra fine details and stand up to the challenges faced by sculpting the horse from life. AmazingSculpt is a fine detail modeling clay developed to capture and hold fine details. Small size AmazingSculpt particles are key to precision shaping and tooling at any angle. Average working time is 1 hour, fully cures to a beautiful frost white color in 24 hours. Enhance detail with included Smoothing Solution to add texture and feathering. FXclay is a non-sagging, non-sticky, self-cure modeling clay to capture and hold ultra fine details. Micron size FXclay particles are key to precision shaping and tooling at any angle. Average working time is 1 hour, fully cures to a beautiful mink gray color in 24 hours. Enhance detail with included Smoothing Solution to add texture and feathering.

CARVING SET - 6PC STAINLESS STEEL TOOLS, 12 SHAPES

This carving set contains the essential stainless steel tools for carving 2-part epoxy clay. Set includes a spatula, hook, pick, spade, scoop and combo spade/scoop. Knurled handles provide a positive grip and a durable stainless steel construction resists rust when exposed to water.

- Each tool contains two shapes, 12 total shapes
- Durable stainless construction
- Knurled handles for positive grip
- Each tool is about 6 inches

NO GLOVES CREAM - SCULPT WITHOUT GLOVES!

Acts like an invisible glove to protect the skin against solvents. Great for sculptors who can't use gloves, but still want protection. Does not contain silicone. Contains emollients and moisturizers to soothe skin and a antimicrobial to fight bacteria. Comes in a small 1/2 oz (14g) tube or the larger 4 oz (114g) tube. Photo shows both sizes.

- Superior Formulation - A quality formula that provides protection against solvent-based skin irritants
- Non greasy - Formulation rubs in completely without interfering with grip or dexterity. Contains no silicone
- Effective - Only a small amount is necessary to provide effective skin protection
- Hygienic - Ultrasonically sealed cartridges prevent the ingress of bacteria
- Caring - Contains skin conditioners to prevent drying skin
- Economical - One application provides 2-3 hours of protection against irritants

Amazing Fa-brick is a transparent textile and decoration hardener. Dip nearly any porous natural materials, such as textiles, into Amazing Fa-brick and it will become stiff and rigid when dry. Drape or wrap your fabric around a wire figure, paper mache or other armature to make sculptures from fabric. Dries transparent or add colored pigment powder to give a new look to your sculpture.

AMAZING PIGMENT

Add beautiful color to Amazing Fa-Brick or Amazing Sculpt with our rainbow of dry pigments. Easy to use, just add a small amount of pigment to Amazing Fa-Brick or Amazing Sculpt (Part A), mix until even. Want a different shade? Mix more or or less pigment. How about a different color? Amazing Pigments can be mixed together to achieve a desired shade or color. The "Small" containers are 1/4 fl.oz, about 8ml and can pigment up to 1 gallon of Amazing Fa-Brick or 8 pounds of Amazing Sculpt.
